MARCH

2016

## Satloc G4

### *Smaller and Smarter*

The Satloc G4™ is the most complete and advanced aerial guidance system for aerial applicators. Satloc G4 is built with the top-of-the-line processing power of Intel® Dual-Core™ i7 processor and includes Windows® 7 64-bit operating system.

The Satloc G4 features a new 9-inch, 16:9 ratio touchscreen capable of providing faster video graphics as well as the latest in touchscreen technology. Use multi-touch gestures such as pinch-to-zoom, rotate and press and drag to access information. Experience improved connection speeds for downloading job and shape files and prescription maps. The Satloc G4 features video capabilities including Skype™ and

Ethernet connectivity for cell-based modems. Background maps are available with Satloc G4 systems. Maps enhance flight navigation and confidence by allowing aerial applicators to view flight information such as spray, waypoints, and polygons on background maps.

Stay connected with HQ™, a real-time web-based asset tracking tool that allows companies to track the position and position-related data of aircraft and other assets, such as spotter vehicles and loader trucks.

The Satloc G4 system includes a 9-inch touch screen, CPU, A21™ antenna and external CAN lightbar.

### ***Benefits***

- Intel® Dual-Core i7 processor
- 5 powered USB ports (3 remote)
  - 4 GB RAM
- 32 GB optional storage space on Mini SATA drive
  - Windows® 7 64-bit operating system
- Crescent® board inside with 20 times per second update rates
  - 9-inch, 16:9 ratio touchscreen
  - Internet and video capabilities
