MID-CONTINENT AIR-CRAFT CORPORATION is located in Hayti, Missouri, 80 miles north of Memphis, Tennessee. Although Hayti is not the geographical center of our nation, **MID-CONTINENT** is the center for all ag aviation needs.

With excellent daily truck freight lines, air freight, Federal Express, and UPS delivery capability, **MID-CONTINENT** has and will continue to cover the world.

These FAA approved STC (#ST5783WI-A) wire cutters are the newest advancement in wire cutter technology (Patent Pending).

Three years of research and development have gone into this unique design to create a safer platform for both plane and pilot. The blade has been heat treated to a level of 61 Rockwell Hardness which would be equal to the hardness of a file or chisel. Spacer blocks have been positioned at five points along the blade to increase strength and stabilize the blade in case of a wire strike. Adel clamps positioned along the trailing edge of the landing gear secure the brake line and do away with the standard black zip ties currently used to secure the brake line.

Storm Cutters are now available for the 500 series of Air Tractors (AT-501, AT-502, AT-502A, AT-502B), and we are currently moving to encompass every model of Air Tractor from the 300-800 series. This is yet another advancement in safety for the ag aviation industry. Cutters are currently available in stock.

Countryside Aviation in Chilton, WI is now a midwest dealer and installation facility for our Load Hawgs. Call Dean Heimermann at 920-205-5900.
