SC Company Purchases '18 Thrush

Williamsburg Air Service of Kingstree, South Carolina recently purchased a 2018 Thrush S2R-T34 from Mid-Continent Aircraft Corporation. Guy McClary picked up the aircraft and flew it back to South Carolina.

Williamsburg Air Service specializes in aerial crop dusting services.

The Thrush is one of the most successful and long-lived agricultural application aircraft types in the world, with almost 2,000 sold since the first version flew 62 years ago. Typical of agricultural aircraft, it is a single-seat monoplane of a conventional taildragger configuration. Originally powered by a radial piston engine, most versions produced since the 1980s have been turbo-prop-powered.

Williamsburg Air Service was founded in 1999.

Mid-Continent Aircraft is proud to serve aerial application and crop dusting companies from across the world.

Guy McClary of Williamsburg Air Service picks up his 2018 Thrush S2R-T34.
